

Dishwasher Detergent Cubes

- 1 cup borax
- 1 cup washing soda
- 1/4 cup Epsom salt
- 4 Tbsp lemon juice

Mix all the powders together. (Make sure they get mixed up good).

When everything is mixed put a cup of the powder into a separate bowl then poured in the lemon juice. You do not want it to be dry but you do not want it soaking wet either. (The lemon juice will foam when it hits the powder).

Once you have it mixed together well, start filling the ice cube trays, patting each one down as you fill them. Set the cubes aside in a dry warm area to dry. Once dried, flip the trays over and knock the cubs out.
